

All it takes is **one solution** to attain school bus fleet efficiency and students safety!

With accurate information better decisions can be made! Location Solutions presents an innovative solution that combines effective management of school bus fleet and student safety. Tracking school bus fleet not only reduces road emergency situations but also optimizes school bus fleet efficiency and most importantly attains safety to all students. The school transport management solution consists of three pillars:

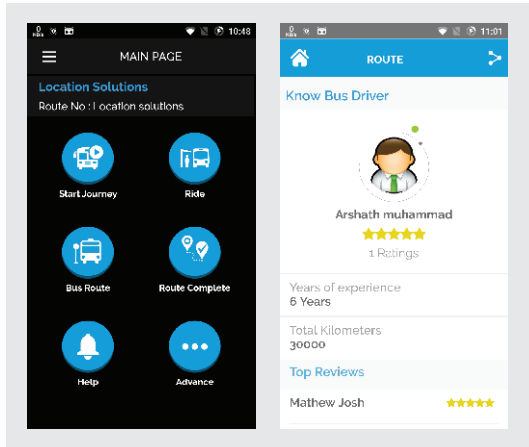

## The school bus management & tracking platform

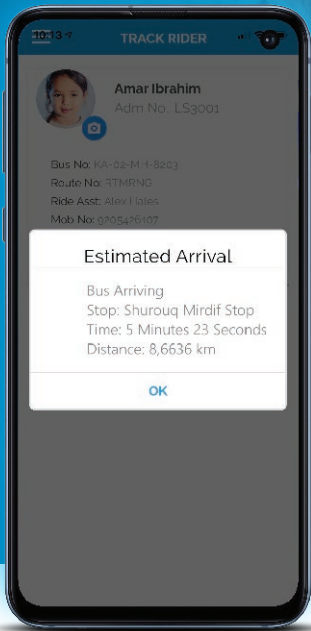

Provides live tracking of school bus fleet with high level of security & safety checks with integrated CCM system (child check mate) which is designed to ensure no kids are forgotten in the school bus. In addition to other information like driver performance, vehicle idling & utilization reports, electronic vehicle inspection & diagnostics reports, scheduled & customized reports, instant alerts, and communicates with parents & ride assistant app.

# The Ride Assistant App

Reports urgent matters to school administration & parents by sending messages, alerts & notifications, updates trips, stops & routes including students' new location, check in & check out students using rider identification card or manually using a tablet.

## Parents App

Parents are able to track their children live, receive alerts and notifications of bus stops and time of arrival, identify the bus driver, monitor the school bus speed, and communicates with school administration and ride assistant via instant messaging.
